Backend-focused Software Engineer with hands-on experience building scalable microservices using Java and Spring Boot. Strong in designing production-ready systems including scheduling engines, audit logging, and secure authentication workflows. Experienced in SQL Server, cloud deployments, and integrating frontend systems using Next.js when required.

EXPERIENCE

BITCOLLAGE Consulting services | Software Engineer

Jan 2025 – Present

- **Designed and developed REST APIs** using Java, Spring Boot, and SQL Server, improving development efficiency by ~30% through reusable design patterns and optimized validation strategies
- **Built OTP-based authentication and verification system**, along with audit logging and soft-delete support, strengthening security and compliance across services
- **Engineered a scheduling & rescheduling system** with role-based workflows (admin, teacher, student), reducing manual coordination effort by ~40%
- **Developed modular content management system** supporting ZIP-based learning packages with validation and iframe rendering
- **Designed Question Bank microservice** with hierarchical subject–topic–subtopic mapping and multiple exam creation flows (manual, quick, format-based)
- **Implemented CI/CD pipelines** using GitHub Actions and automated deployments to Azure App Service
- **Managed database versioning using Liquibase**, ensuring schema consistency across environments
- Contributed to **future system design** including notification services, calendar integrations, and scalable microservice architecture
- Developed compliance-focused data modules with audit logging and soft-delete mechanisms to ensure data traceability and historical integrity
- Built structured data ingestion and validation pipelines for multi-entity workflows

SKILLS

Backend and Core:

Java, Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, Microservices, JDBC

Frontend: Next.js, React, TypeScript, Tailwind CSS

Databases: SQL Server, MySQL, RDBMS, Liquibase

Cloud/DevOps: Docker, GitHub Actions, Azure (App Services, Blob Storage, AKS), AWS (EC2, S3, ECS)

Architecture and systems : Design Patterns, Clean Architecture, Layered Architecture, Distributed Systems

Security & Features: JWT Authentication, OTP Verification, Audit Logging, Soft Deletes, File Storage, PDF Generation

Testing & Tools : JUnit, Mockito, Swagger, OpenAPI, Git

EDUCATION

PCCOE - Pimpri Chinchwad College Of Engineering, Pune.

Bachelor of Engineering in Mechanical Engineering

Pune, India

Jul 2018 – Jul 2021

PROJECTS

Distributed Scheduling & Workflow Engine

- Designed a role-based scheduling system handling **conflicts, rescheduling, and admin overrides**
- Implemented validation layers to ensure **consistency in concurrent scheduling scenarios**
- Built extensible workflows for teacher-student coordination with future support for calendar integrations

ACHIEVEMENT:

- Received Emerging Genius Award for CDC project in 2024
- Delivered full-stack educational platform supporting **1000+ active users**
- Implemented **role-based access control and security workflows** in production systems
